Professional Summary

Data-driven operations professional with 7+ years of experience in technical support, operational leadership, and customer experience optimization at Apple. Skilled in Python, SQL, Tableau, and data visualization to analyze operational metrics and improve business performance. Proven ability to lead cross-functional teams, streamline workflows, and translate data insights into strategic improvements. Seeking opportunities in data analytics, business operations, or technology organizations where analytical thinking and operational leadership can drive measurable impact.

EDUCATION

University of Maryland Global Campus

- Bachelor of Science in Data Science | May 2026
- Relevant Coursework: Machine Learning, Big Data Systems, Data Visualization, Statistical Modeling, Cloud Computing, Data Analytics

WORK EXPERIENCE

Apple Inc.

Genius Admin | Atlanta, Georgia | April 2022 - Present

- Manage daily service workflows, technician scheduling, and operational priorities to support 300+ customer interactions per week
- Coordinate cross-functional teams including Technical Specialists, Technical Experts, Geniuses and Leadership to maintain operational performance and service quality
- Track and analyze service KPIs to identify workflow inefficiencies and implement data-driven process improvements
- Serve as liaison between retail teams and corporate partners to escalate critical issues and communicate operational updates
- Support product launches, operational initiatives, and internal training programs aligned with company objectives
- Mentor peers and technicians by providing guidance on workflow management, service quality, and operational accountability

Apple Inc.

Retail UAT Tester (Career Experience) | Remote | June 2026 – Present

- Perform User Acceptance Testing (UAT) on Apple Retail Systems and applications prior to production release
- Execute structured test cases, document defects, and provide detailed feedback to improve software quality and usability
- Collaborate with cross-functional teams and Apple Retail employees worldwide to validate new features and system enhancements.
- Create clear, technical documentation by breaking complex workflows into detailed, repeatable testing steps.
- Identify issues affecting the retail experience and verify fixes before deployment to Apple Stores globally.
- Adapt quickly to evolving software builds, testing priorities, and development timelines while maintaining high attention to detail.

State Farm
